EFTA
EFTA EGYPT, LTD.
www.efta-egypt.com

FTA-Egypt was established in 2005 as a part of EFTA Group. Our Head office is EFTA Elektrotechnik GmbH in Germany, which was established in 1992 working in (Combustion engineering and Automation, Basic engineering, Process engineering, Safety engineering, Details engineering (PLC, DCS and SCADA), Control panels) EFTA-Egypt is a well-known customer-oriented independent stocking distributor for electrical, mechanical and process control parts. EFTA-Egypt has a proven history of high quality, performance and reliability. We will quickly and accurately provide you with high quality products at competitive prices with no minimum order and will deliver them overnight from our extensive inventory. Performance testing is conducted to insure highest quality. In 2011 EFTA Egypt got ISO/TCL 9001:2008 .

Elektro-Apparate-Werke Berlin' was originally founded by AEG to manufacture relays, even back in these early days. Fast-forward to today and this tradition still continues, although eaw has covered many other areas of electrical engineering over the years as an East German conglomerate and now employs 8000 people. Since 1993, the decades of company history have been incorporated into what is now known as eaw Relaistechnik GmbH. The knowledge and expertise developed over the years is now associated with leading technology for thermal sensors from a single manufacturer, whose portfolio includes thermal, electromechanical and electronic relays.

MBS AG was founded in 1977 as a limited company in Sulzbach-Laufen, near Stuttgart, and is one of the world's leading manufacturers of low-voltage transformers and measuring transducers. Our products are used in mechanical and plant engineering, regenerative power recovery and in ship-building.

Kraus & Naimer

We are the global market leader in cam switches and have specialized in industrial switches of all types. Designing, producing and supplying main switches, control and repair switches as well as switch disconnectors, we will find the ideal solution for almost every application. The flexible modular system allows us to produce individual, custom-made products with numerous extras such as locking devices, key switches, or auxiliary contacts.

ELEKTRA
TAILFINGEN
SCHALTGERÄTE

Solution-oriented, flexible, close to the customer Switches, industrial connectors, distributors, testers and measurement devices: we offer individual solutions in these product segments to our customers around the globe. Our comprehensive core product line and a well thought out building block system enable us to respond quickly and highly flexibly to any and all demands. Personal support from one Elektra contact person is one of our major concerns and an important pillar of our success.

Overhead Line Conductors

Control Cables

Cable duct

A cable duct is a form of housing for a run of cables that has to pass a traffic area such as a doorway or be run up a wall without being seen. Depending on the environment and the intended use, the cable duct can be manufactured out of a number of materials. Materials range from plastics of any color.

Surge arrester

A surge arrester is a device to protect electrical equipment from over-voltage transients caused by external (lightning) or internal (switching) events.

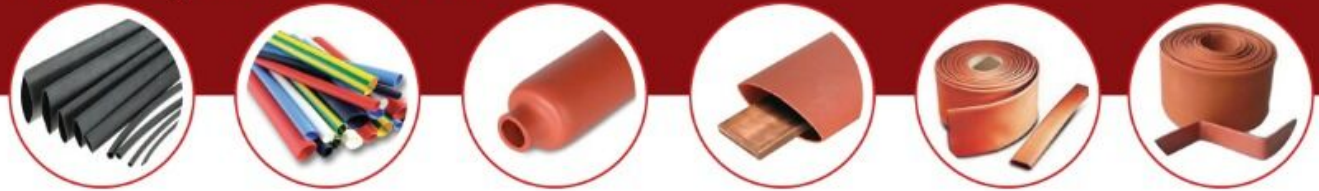

Also called a surge protection device (SPD) or transient voltage surge suppressor (TVSS),

A surge arrester is used to protect equipment in power transmission and distribution systems. (For consumer equipment protection, different products called surge protectors are used.)

Heat-shrink tubing

is a shrinkable plastic tube used to insulate wires, providing abrasion resistance and environmental protection for stranded and solid wire conductors, connections, joints and terminals in electrical work. It can also be used to repair the insulation on wires or to bundle them together, to protect wires or small parts from minor abrasion, and to create cable entry seals, offering environmental sealing protection. Heat-shrink tubing is ordinarily made of polyolefin, which shrinks radially (but not longitudinally) when heated, to between

Approximately 90,000 quality tools, more than 500 manufacturer brands as well as GARANT and HOLEX Tools have been our passion since 1919.

The range, which is updated on a yearly basis, comprises more than 500 global leading manufacturer brands as well as our own premium brand GARANT and the quality brand HOLEX. Discover the following product groups for all application areas:

Machining , Clamping technology , Metrology , Grinding and cutting , Fastening tools for screws , Gripping-, cutting and impact tools , Hand and assembly tools , Personal Protective Equipment , Power tools and workshop supplies and Workstations and storage .

With GARANT the Hoffmann Group is offering you a premium range of products for various applications, offering the highest level of availability, combined with efficient, comprehensive service, all from one source, to help increase your productivity.

HOLEX stands for good industrial quality and fair prices. Our HOLEX range comprises over 9,000 products from all groups of the current catalogue: From machining tools to clamping, measuring, grinding, cutting, and hand tools, up to workstations and storage equipment. Under heavy load these products convince by high stability, quality, and reliability.

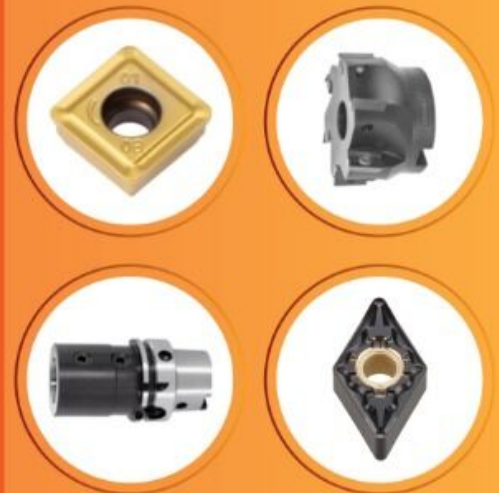

Mono Machining

This includes HSS drills - Solid carbide drills - Taps - Dies - Countersinks - Reamers - Saws - Bore type milling cutters - HSS milling cutters - Solid carbide milling cutters - Spare parts and more.

Modular Machining

This includes Indexable milling cutters - Indexable drills - Indexable inserts Komet - Indexable turning - Knurling tools - Spare parts and more.

Clamping Technology

This includes Toolholders - Lathe chucks - Lathe centers - Tapping heads - Drill chucks - Vices
 Clamping elements- Magnetic clamping technology and more.

Measuring tools

This includes calipers – micrometers – dial indicators – squares – tape measures – calibration serves –and more.

Grinding & Cutting

This includes milling and grinding points – roughing and cutting disks – grinding wheels for off-hand grinders –wire brushes - circular saw blades for wood - hacksaw blades and more .

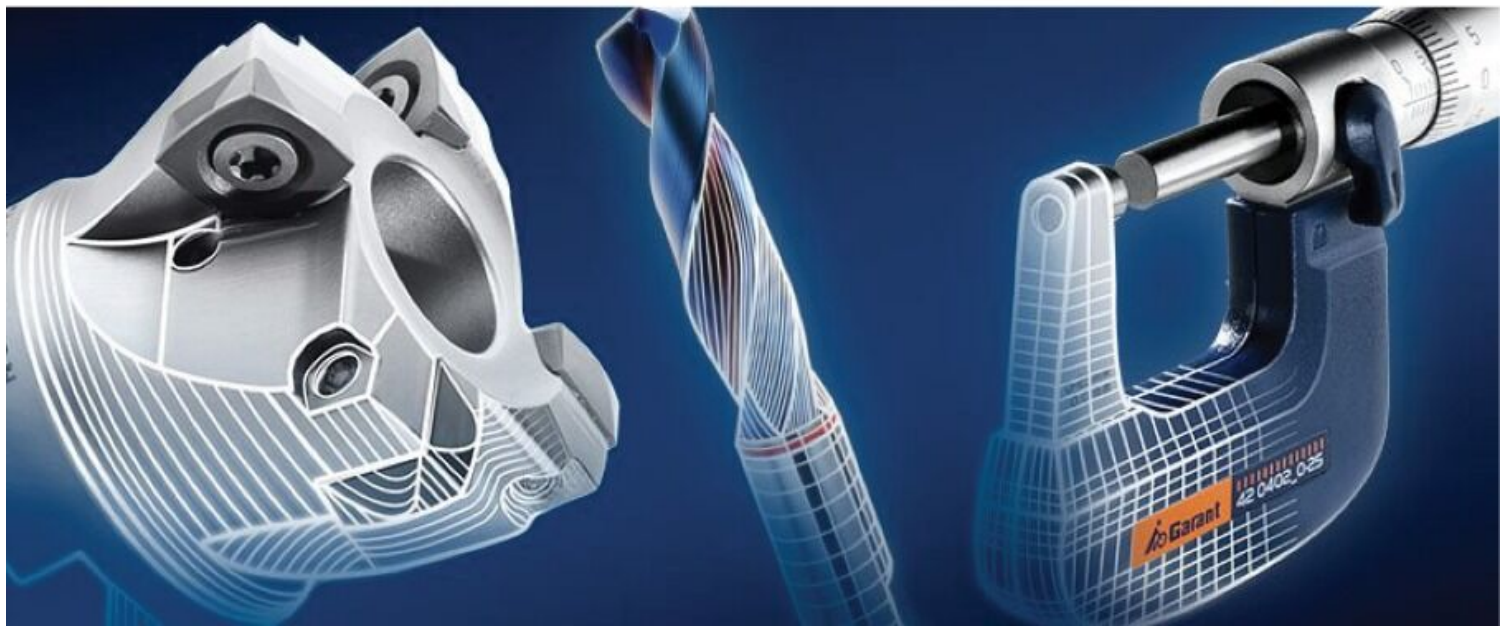

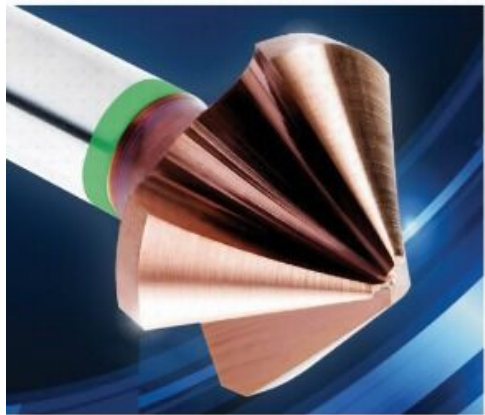

Hand Tools

This includes Screwdriving tools - Torque drive tools - Pliers & tweezers - Deburrers & scrapers - Cutting tools - Striking tools - Clamping tools - Tool sets, mixed - Hand tool storage - Assembly & disassembly tools - Riveting tools and more.

Amazing Precision bring inner Power

— German Tools

In the «**Brandoni flower**» there is the whole history of the company: born from the need to visually represent the **seven product categories**, their interconnection and uniqueness, the FLOWER is today the symbol of **Brandoni's ability to differentiate itself** by remaining coherent and effective. Like the petals, so the colors represented by the Flower are seven to describe:

Shut-Off Valves

Regulation

Check Valves

Filtration

Solenoid Valves

Protection

Servo Motor

Series 0260 ≥ 50-Nm

Series 0120 ≥ 15-Nm

Series 0240 ≥ 25-Nm

Series 03180 ≥ 120- Nm

Top quality – Trusted Whether

it is energy recovery from gas, oil, water, industrial furnace construction, the chemical industry, mineralogy and more, Uni-Geräte valves are trusted and used all over the world in a variety of systems.

Gas pneumatic valve

Gas solenoid valve

Valves for liquid media

Flow control valve

MEDENUS

Gas Pressure Regulation

MEDENUS stands for quality
«**Made in Germany**».

Founded 1972 by Dieter Medenus in
Rösrath near Cologne.

With gas pressure regulators, safety
shut-off valves and safety relief valves
a customer-oriented product portfolio
was developed.

With his well-earned retirement Dieter Medenus retired from the company in 2004. The production facility was relocated to the company's current headquarters in Olpe, South Westphalia - since 2019 a new headquarters has been built here with a focus on further optimized delivery times and best customer service.

We deliver our complete product range with the proven MEDENUS advantages, quality with short delivery times and absolute adherence to delivery dates worldwide. The location in Germany's third largest industrial region is a clear advantage. Direct motorway access and the proximity to the logistics centers in Frankfurt or Rotterdam are not only an advantage for shipping, but also for accessibility for training and maintenance.
